SUMMARY

Results-driven Graphic Designer with a strong eye for detail and expertise in developing cohesive visual identities across digital and print platforms. Proven ability to translate complex concepts into clear, engaging visuals that align with organizational goals and enhance user experience.

WORK EXPERIENCE

Keysight Technologies

Web developer
(March 2022 – October 2025)

~ As a Web Developer at Keysight Technologies since March 2022, I was responsible for developing and maintaining web applications to support the company's business objectives.

~ Implemented responsive and user-friendly web interfaces using HTML, CSS, Java and Angular, resulting in improved user experience and increased customer satisfaction.

~ Worked with IT Web Operations team to work on IT managed portals and associated and integrated applications.

DESIGN AND TECHNICAL PROJECTS

Gather Grounds | Board Game Café Brand Project

~ Collaborated in a multidisciplinary team to design and develop the Gather Grounds brand – a board game café concept that blends coffee culture with community engagement.

~ Contributed to packaging design, branding, and visual storytelling, from moodboards and logo development to product packaging and digital assets.

~ Supported cross-functional efforts in advertising, UI/UX design, and interactive prototyping using Adobe Illustrator, Photoshop, Dimension, and XD.

The Cultural Artwork Hub | Coding language – JavaScript

The Cultural Artwork Hub is a user-friendly app that enables anyone to create and explore art with ease.

~ Implemented a gallery feature that allows users to browse and discover a wide range of artwork from different cultures.

~ Developed a drawing tool with various brushes, colors, and effects, providing users with the ability to create their own artwork. Created a search feature that allows users to find specific artwork based on artist, style, or medium.

Web Reporting Tool | Coding languages – Java, Angular and Hibernate

The Web Reporting Tool is a powerful application that provides users with intuitive reporting capabilities for analyzing and visualizing data.

~ Developed a user-friendly interface using Angular, allowing users to easily navigate and interact with the reporting tool.

~ Created dynamic report generation functionality, allowing users to customize and generate reports based on their specific requirements.

~ Implemented role-based access control, ensuring that only authorized users can access and view sensitive data.
